Your simple review plan

For Group 8, IC-C · Borrow Instead of Buy

> **Your review is offline on 16 or 17 November 2026.**
> Your guide will tell you the exact day, time and place. All 4 members must be there.

First, do these 4 things

1. Ask your guide for the review details.
Ask for the date, time, room, and when to get the form signed.

2. Start the 7–8 paper review today.
Find papers about sharing, borrowing and trust. Page 3 tells you what to write.

3. Make the presentation.
Use the notice's first-slide format. Maximum 13 slides. Every member must speak.

4. Prepare your form and proof.
Fill FF-180 Review 1 with your real progress. Arrange someone from another group to take photos and a video.

> **Important correction:** The earlier plan used the wrong marking points and slide limit. Use this updated plan instead. The notice asks you to show progress and present status; it does not say the app must be finished.

Guide: Mr Dhananjay Pawar · Group 8 · Roll numbers 331–334

Five things to prepare

Each point is worth **10 marks**. Total: 50, later converted to 30. Your own contribution matters too.

1. Registration, synopsis and Review 1 report
Check that the project title is registered, the synopsis is ready and the report is completed and approved by your guide.

2. Literature review
Read and review 7 or 8 research papers related to your project. Put them in the required table on your slides.

3. Group and individual work
Show the four members and explain what each person actually did.

4. Project objectives
Explain what you want to achieve: help campus members borrow useful items instead of buying them, and make sharing more trustworthy.

5. Questions from the teacher (viva)
Each person should explain the project, their work, and the tools or technology they learned.

Practise these questions

- What problem are you solving, and for whom?
- How will people borrow an item? How will you build trust?
- What have you personally done and learned?
- Which tools did you actually use? What is still left?
- What did you learn from the papers?

Only claim features, results and numbers you can show or support. The project form lists ideas and planned tools; it does not prove they are already built.

Make the paper review

“Literature review” just means: **read related research papers and write what you learned.** The notice expects 7 or 8 papers in a table.

For each paper, note these 7 things

1. **Sr.No** — paper number
2. **Title of research paper**
3. **Authors**
4. **Name of Journal/Conference**
5. **Date of publication (Month and Year)**
6. **Brief summary of work (2/3 lines)**
7. **Remarks (Key findings/IMP Technology/Tools/Software Used)**

> **Easy way:** Split the 8 papers on pages 7–8 among the four members. Each person reads 2 and fills the same 7 fields. Check each other's work. Put the rows across several slides so they are readable.

Where to start

Search Google Scholar for **“sharing economy trust”**, **“peer to peer sharing reputation”** and **“campus item borrowing”**. Pick actual research papers, not random blog posts.

Start with pages 7–8: They contain 8 paper links, authors, dates and simple notes. Click a link to open a paper or its information page.

Read the paper before filling its summary. Check the month and year in the publication. Do not make up findings or tools. Your group's old form mentions papers but does not yet contain the required 7–8 reviewed rows.

Make up to 13 slides

This is a suggested order. The notice requires the first-slide format, second-slide key points and the topics below.

Slide 1 — Title: follow the notice's sample. Add project title, division, group number, day/date, member names and PRNs, guide name, department and college.

Slide 2 — KEYPOINTS: Introduction; Objectives; Literature Review; Materials and Components used; Tools and Software Used; Methodology Implemented; Progress Made So Far; Present Status of the Project.

Slides 3–4 — Introduction and objectives: the problem, who it affects, and what your project aims to do.

Slides 5–8 — Paper review: put 7–8 papers in the required 7-column table. Split the rows over slides; keep the headings and text readable.

Slide 9 — Materials, components and tools: show what you actually used. Label anything else as planned.

Slide 10 — Method: explain how you are designing or building the project, including coding or testing if applicable.

Slide 11 — Progress: show what is done and proof such as screenshots, a prototype or a demo, if available.

Slide 12 — Present status: what is ongoing and what is left to do.

Slide 13 — Group work: each member's actual responsibility and contribution.

Use the exact registered title. Check all names and PRNs with the registration record before submitting. On the supplied form, Swastik's G.R. number conflicts with his email number, so verify it.

What to do each day

Suggested plan — the guide may give you different deadlines.

4–5 Nov: Ask the guide for date and form details. Split the 7–8 papers. Confirm everyone's actual work.

6–8 Nov: Read the papers and fill the 7 fields for each. Start slides 1–4.

9–10 Nov: Finish the paper table and the other slides. Collect screenshots or other real proof of progress.

11–12 Nov: Fill the Review 1 form with real progress. Check registration and synopsis. Ask the guide about approval and signatures.

13–14 Nov: Practise together. Every member speaks and answers questions. Fix unclear slides and check the 13-slide limit.

15 Nov: Save the PPT on a laptop and backup drive. Print the form. Confirm the review details and the person from another group taking photos/video.

16 or 17 Nov: Attend at your guide's time and place. Present, collect photos and video, submit the signed form, and send the email.

Split the work fairly

Suyash, Swastik, Swayam and Tamanna: choose a paper-review task and a speaking part each. Explain your **real** contribution, not a role chosen just for the slide.

> **Behind schedule?** First finish the 7–8 paper table, registration/synopsis, signed report and slides. Show your honest current progress. Practise the questions as a group.

On review day

1. Take the FF-180 Review 1 report

- Fill group number **8**, review number **1** and the date. Briefly write: **done / ongoing / yet to do**, using only your real progress.
- Get the guide's signatures at the **top and bottom**. The leader photographs it and submits the signed hard copy to the guide.

The notice shows this on page 3. In your uploaded FF-180 PDF, the bottom signature for Review 1 appears on page 4. Ask your guide for the correct single-page format, or how to submit both parts; do not lose the bottom signature.

2. Arrange the photos and video

- Ask a member of **another group** to take **4–5 geotagged photos** while you present. One must show **slide 1**.
- Ask the same person to record a **1-minute video**. The group leader collects and keeps the photos and video.
- A Google Form link will be shared later for uploading them. Check the phone saves location in photos before the review.

3. After the review, email your guide

The leader emails the **PPT and presentation photos** to the guide. Keep the video for the later form.

> **Subject:** [your Group ID]_ EDI Project 1 _MSR PPT & PHOTOS RECORD_NOV 2026
>
> Dear Sir,
> Please find attached our Group 8 EDI Project 1 presentation and review photographs.
> Thank you,
> [Group leader's name], IC-C, Group 8

Replace [your Group ID] with the exact ID your guide uses. The notice gives this subject format and includes NOV 2026 in its example.

Start with these papers

Click the blue link to open the paper or its information page. Use each paper's details for your slide table. Some full papers may require a login.

1. The Sharing Economy: Why People Participate in Collaborative Consumption

Juho Hamari, Mimmi Sjöklint, Antti Ukkonen · Journal of the Association for Information Science and Technology · September 2016

People's reasons for sharing include saving money and enjoyment. Useful for explaining why someone might borrow.

Open paper: doi.org/10.1002/asi.23552

2. Collaborative Consumption: Determinants of Satisfaction and the Likelihood of Using a Sharing Economy Option Again

Mareike Möhlmann · Journal of Consumer Behaviour · May 2015

In car-sharing and accommodation studies, trust, usefulness and cost savings were important to users.

Open paper: doi.org/10.1002/cb.1512

3. Antecedents of Trust in the Sharing Economy: A Systematic Review

Maarten ter Huurne, Amber Ronteltap, Rense Corten, Vincent Buskens · Journal of Consumer Behaviour · November 2017

This review says trust depends on more than ratings, including trust in the platform and past interactions.

Open paper: doi.org/10.1002/cb.1667

4. Sharing on Platforms: Reducing Perceived Risk for Peer-to-Peer Platform Consumers Through Trust-Building and Regulation

Sarah Marth, Barbara Hartl, Elfriede Penz · Journal of Consumer Behaviour · June 2022, online

Studies how platform rules and trust-building measures can reduce concerns about risk.

Open free full text: pmc.ncbi.nlm.nih.gov/articles/PMC9821683/

These notes are starting points. Read each paper and write your own 2–3 line summary and key finding for the required table.

Four more papers

These are related to your topic, though some study sharing in other settings rather than on a campus.

5. Collaborative Consumption in Consumer Behavior of Polish Young People

Tomasz Zalega · Journal of Economics and Management · September 2018

Discusses sharing among young people and their concerns about sharing with strangers.

Open paper: doi.org/10.22367/jem.2018.33.08

6. New Models for Collaborative Consumption: The Role of Consumer Attitudes Among Millennials

Francisco J. García-Rodríguez, Desiderio Gutiérrez-Taño, Inés Ruiz-Rosa, Nisamar Baute-Díaz · SAGE Open · December 2022

Looks at reasons young adults take part in sharing, including sustainability and economic benefits.

Open paper: doi.org/10.1177/21582440221140389

7. Trust-Building in Peer-to-Peer Carsharing: Design Case Study for Algorithm-Based Reputation Systems

Thomas Neifer, Paul Bossauer, Christina Pakusch, Lukas Boehm, Dennis Lawo · Computer Supported Cooperative Work · May 2023, online

A car-sharing app study explores whether reputation scores can help build trust.

Open paper: doi.org/10.1007/s10606-022-09461-4

8. Trust in the Sharing Economy

Florian Hawlitschek, Timm Teubner, Christof Weinhardt · Die Unternehmung · April 2016

Discusses trust in the other person, the platform and the product being shared.

Open paper: doi.org/10.5771/0042-059X-2016-1-26

Dates use the journal issue month where available; “online” means the first online publication month. Check the paper page before copying details into your slides.

Final quality check

Do these things well

- **Paper table:** Include 7–8 real papers, all 7 required headings, and a short finding for each. Keep the text readable.
- **Show the truth:** Clearly separate what is done, what is in progress and what is only planned. Have screenshots or a demo ready if you have them.
- **Everyone speaks:** Each member practises explaining their own work and the tools they actually learned.
- **Check with the guide:** Confirm the review time and room, registration, synopsis, report approval and correct FF-180 format.
- **Before you leave:** Charge the laptop, save a backup of the PPT and check the printed form. Test photo location settings.

Do NOT do these things

- Do not use more than **13 slides**, skip the required first two slides or leave the paper table incomplete.
- Do not invent paper findings, fake results or say a feature is built when it is only an idea.
- Do not let one person do all the talking. Each member is assessed individually too.
- Do not forget the **two guide signatures**, the photo of slide 1, or the person from another group.
- Do not assume the review time or room. Wait for your guide to confirm.

> **If you have just one hour now:** Ask the guide for details, send the paper links to your group, assign two papers each, and start slide 1.

Based on the EDI Project 1 notice dated 3 November 2026 and your group's supplied FF-180. The daily schedule and extra tips are suggestions, not additional notice rules.
